103-105 ARCH STREET **PHILADELPHIA, DEC. 27, 1930.**

THE NEW YEAR: As the year 1931 opens it is important to realize that agriculture is the most essential of all basic industries. It rests upon a firmer foundation than any other business, and approaches so closely to the very essentials that agricultural activity will be continued and even increased in the face of any temporary depression which may prevail in general and less essential industries.

MARKET CONDITIONS: Insufficient moisture last summer did great damage to pastures, resulting in serious hay shortage. In certain sections of the South and Middle West conditions are so acute that the Government has taken steps to supply forage seeds to re-establish needed pasturage. It is generally felt that the remarkably good demand for field and grass seeds which prevailed in Pennsylvania and New Jersey last Fall will be continued during the coming Spring season. In most cases the available supplies are considerably less than a year ago and as a consequence, the general feeling is for firmer markets in this line. To some extent prices may be affected by other commodity markets, but in general it seems reasonable to anticipate a good demand for field seeds and grasses with prices stronger comparatively than seem to prevail in other commodities.

As the time approaches for a more active market we will pursue our customary policy of discussing various items in particular; in the meantime kindly feel free to write us for latest information and market conditions on any of the items quoted below.

Prices quoted below are today's values f.o.b. Philadelphia. Samples sent promptly upon request. Bags not returnable. Upon request we can supply our seeds packed in 1 bu. bags made of towelling material of first quality. Each bag will make two single towels or one double towel. Seed so packed is invoiced at an advance of 50 cts. per 100 lbs., net weight, bags free.

(1)

CLOVERS

ALFALFA

{60 LBS. PER BU. 16-20 LBS. PER ACRE}

The records of origin for Alfalfa seed sold by us are kept in accordance with a plan approved by the U. S. Department of Agriculture and are maintained under the supervision of that Department. Under this system

ALFALFA

and by special arrangement with that Department we are authorized to issue verified-origin seed certificates for such seed, the locality of production of which has been verified by a Federal seed inspector.

RED CLOVER

{60 LBS PER BU. 10-12 LBS. PER ACRE}

	PER 100 LBS	PER BU
ADAPTABLE (1% Stained Green)		
QUAKER / Choice — STRICTLY NEW CROP	Write for prices	

Quotations on Adaptable Red Clover are for No. European grown seed recleaned over various processes to remove impurities peculiar to foreign grown seeds. Imported Clover seed maybe sold at much lower prices in original heavy burlap sacks. It has always been our policy, however, to oppose the distribution to the farmer of foreign grown Clover seed from original imported packages account of the danger of sowing noxious weed seeds. Our stocks are strictly new crop.
